

Workshop

All aboard to Vaccination Station! An interactive comic workshop with Adam Murphy

Saturday 19 November 2022

1pm - 3pm | Families | In-person event
Booking required

What do cows have to do with vaccination? Who did the first vaccine, and what for? What did vaccination look like in the 1800s? And why is it so important today? Find out at this interactive zine-making workshop!

Join the Heritage Team with award-winning comic artist Adam Murphy (CorpseTalk, Lost Tales) and learn all about the history of vaccination in Scotland. Then, make your own comic about one of the earliest vaccine stations in Britain - organised by the doctors of our College in the 1800s!

A perfect afternoon for all budding illustrators and comic fans!

The workshop is suitable for ages 9+ (children must be accompanied by an adult). Refreshments will be available.

Tour

Twilight Tour: The College collections after dark

Wednesday 7 December 2022

7pm - 9pm | Adults | In-person event
£10 - Booking required

Experience the College like you never have before with our first-ever Twilight Tour!

Guided by our heritage experts, you will receive a bespoke tour of the College: featuring a behind-the-scenes look at our historic buildings and rare medical heritage collections.

Enjoy a drink in our Victorian Lower Library, get exclusive evening access to our 2022 exhibition, and learn about Glasgow's fascinating medical history in the warm festive glow of our Christmas decorations.

Tour lasts approximately 1 hour. Ticket includes 1 glass of wine or soft drink on entry and 1 festive cocktail after the tour has ended.

100% of the ticket cost goes directly to the HOPE Foundation.

Visit the Royal College of Physicians and Surgeons of Glasgow

The Royal College of Physicians and Surgeons of Glasgow is an accredited museum, library and archive, with collections relating to health and medicine spanning over six centuries.

Tours: Our museum and historic buildings are open to the public for individual and group tours - suitable for all ages! If you would like to book a tour, please contact us to arrange your visit.

Research: Access to our library and archive is by appointment only. Contact us to book a visit to our Reading Room.

Events: Places at all events are subject to availability so please make sure you book in advance. For full details, visit: rcp.sg/heritageevents

Unless otherwise stated all our events take place at the Royal College of Physicians and Surgeons of Glasgow, 232-242 St Vincent Street, Glasgow, G2 5RJ.

The College is fully accessible for wheelchair users and there is an easy-access toilet.

COVID-19: Please note that access to the Royal College building is dependent on government guidelines and is subject to change.

You can also visit our website for our digital exhibitions, heritage blog, podcasts and videos, digitised collections, and catalogues:

Support HOPE

Since its incorporation in 1599, philanthropy has been at the heart of the College's heritage and identity. We know that small changes and shared learning can make a huge difference in the provision of healthcare, especially when enacted with compassion.

The HOPE Foundation enables the College and its members to act upon this knowledge by providing philanthropic support to charitable health initiatives. We fulfil our purpose through fundraising, grant-making and disseminating learning from our funded projects.

All of our Medical Heritage events, ticketed and un-ticketed, are in support of the HOPE Foundation.

100% of donations to HOPE go directly towards health-related projects locally, nationally and internationally. To find out more and to support the HOPE Foundation, visit: rcp.sg/hope

Crush Hall Exhibition

Vaccination: finding the 'perfect disease'

In 1796, Edward Jenner discovered the first vaccine for smallpox: a devastating, disfiguring, and deadly disease which wrecked its way through British society during the 18th and 19th centuries. Our 2022 exhibition explores the impact of vaccination on Glasgow's health, and the important role of the city's physicians and surgeons in battling infectious disease throughout the centuries.

College Hall Exhibition

Admitting Women

The 'Admitting Women' exhibition introduces four new interpretive, contemporary artworks to the illustrious College Hall in recognition of the lives and achievements of four incredible doctors who fought for gender equality within the College in the late 19th and early 20th centuries: Elizabeth Adelaide Baker, Dr Jessie MacLaren MacGregor, Dr Anne Louise McIlroy and, the College's first female fellow, Jamini Sen. This temporary art installation challenges our understanding of medical heritage and celebrates the incredible work of women in healthcare.

Ends Friday 4 November 2022.

Open Day

Doors Open Day 2022: 'A City in Flux'

Saturday 17 September 2022

10am - 4pm | All welcome | In-person event

No booking required!

We are delighted to welcome you back to our home on St Vincent Street for Glasgow Doors Open Day 2022!

Over the centuries, the College has witnessed first-hand the transformative changing landscape of Glasgow. In celebration of the theme 'city in flux', we will be opening our doors to the public for a self-guided tour around our beautiful historic buildings. Trace the College through the ages and learn about the role of health and wellbeing in the development of our great city of Glasgow.

Workshop

Explore our collections: An introduction to medical heritage archives

4 - 6 October 2022

AM/PM workshops available (full details online)

Students | In-person event | Booking required

Join the Heritage Team for an introductory workshop on our extensive medical heritage collections. Learn from our experts about engaging in archive research and discover collections related to your own interests - or maybe even inspiration for your next big project!

This event is tailored towards third- and fourth-year undergraduate students and postgraduate researchers within medical humanities, but is open to anyone with a passion for histories of health and medicine interested in accessing medical heritage archives.

ANOPHELES MACULIPENNIS

Talk

Ronald Ross and his Monstrous Malady: 120 Years of Malaria Prevention

Wednesday 19 October 2022

6pm - 7.30pm | Adults | Hybrid event

In-person: £10 | Online: £7 | Booking required

In 1902, an Indian-born doctor named Ronald Ross (b. 1857) became the first Briton to receive the Nobel Prize for his ground-breaking work on the transmission of malaria. His research and commitment to disease prevention were central to developing measures to combat malaria and other "tropical" diseases across the world. Join the Heritage Team with Dr Emilie Taylor-Pirie as we trace the life and works of the enigmatic Sir Ronald Ross and his contribution to medicine, society and culture.

Ticket includes a drinks reception and access to our 2022 Crush Hall Exhibition.

100% of the ticket cost goes directly to the HOPE Foundation.
